Aiper Scuba SE

Key Features

Hydro Dynamic Design Enhances Performance - The Scuba SE's hydrodynamic design allows the device to flow through your pool as it propels across the pool floor, picking up dirt and debris, while dedicating that saved power to the Scuba SE's cleaning capabilities.

Powerful Cleaning Performance

This small but mighty pool cleaner is an aquatic workhorse, cleaning up to 90 minutes and filtering 20 GPM (75 LPM) of your pool's water, all while storing more debris in its two-liter filter box. The powerful dual-drive motors are ready to conquer even the toughest cleaning jobs for pools up to 860 square feet.

Audio Alert System - You're always in the know when it comes to your pool cleaning, thanks our easy-to-understand audio alerts. Scuba SE owners will always know the status of their device, no matter what.

Other Features

Quick Drainage - Retrieving your device is now easier than ever, a newly improved sophisticated water purging system drains up to 80% of stored water in just 15 seconds, making the Scuba SE ultra-portable.

One-Click Activation - Aiper has made every effort to make cleaning simple. So we designed the Scuba SE with a sleek, simple One-Click activation setup. Simply turn the device on, place it in your pool, and watch cleaning perfection happen right before your eyes.

Auto-Parking - Simplicity and convenience come together in the Scuba SE with its auto-parking capabilities. Because not every time is a time for a jump in the pool, the Scuba SE will automatically park near the wall of your pool when the battery is low or cleaning is finished.

Cordless - Eliminate hassle, tangles, and trips by joining the times and cutting the cord. The Scuba SE is completely cordless, making it lighter, more portable, and easier to store than those outdated corded cleaners.
